

## Model: Mini-Series

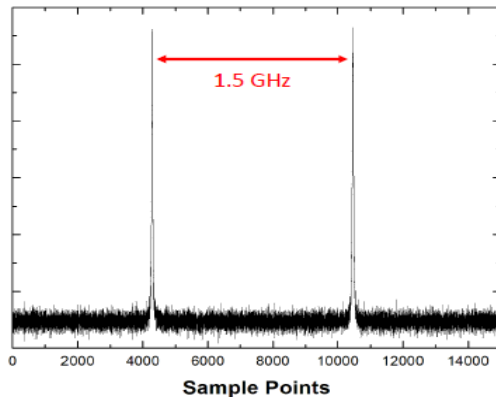

### New Model Available 2023!

Low Cost special pricing possible for volume orders

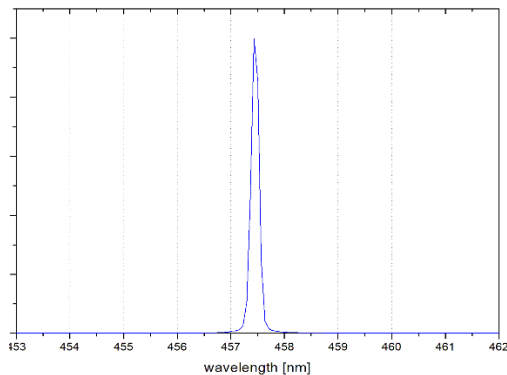

Simple operation and easily integrated into larger systems

Additional features and custom designs are possible

### Single Frequency Operation

### Sample Spectra

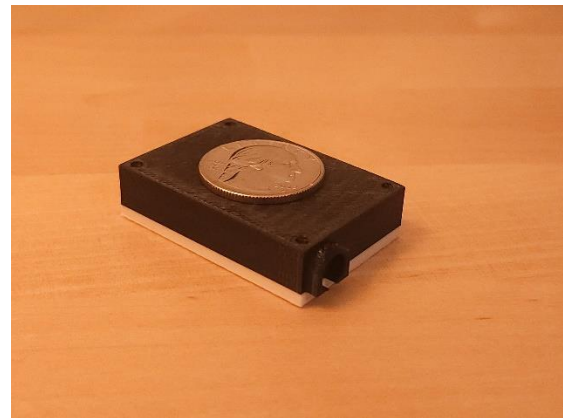

### Features

Single frequency operation with linewidth <500kHz.

Wide variety of wavelengths from 900-1080nm and visible outputs from 450nm to 540nm

Output power up to 100 mW (wavelength and cooling system dependent)

Custom tuned to desired wavelength

### Information

Simple operation needs only laser driver capable of 2 Volts and 3 Amps

Custom designs possible

Total laser volume 1 cubic inch  
1.8" x 1.25" x 0.45" (L x W x H)
