

## Model V-Series III

Sample Output Power

Features

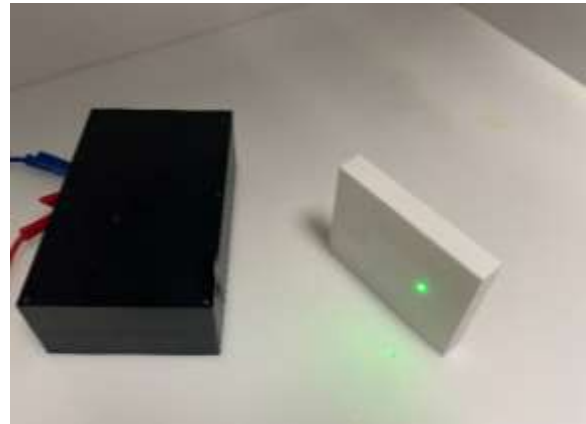

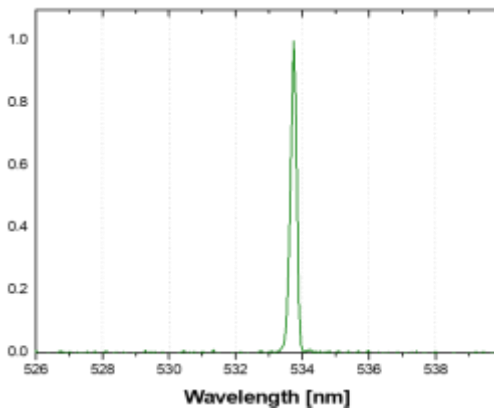

Wide variety of wavelengths from 900-1080nm and visible outputs from 450nm to 540nm

Output power up to 10W (wavelength and cooling system dependent)

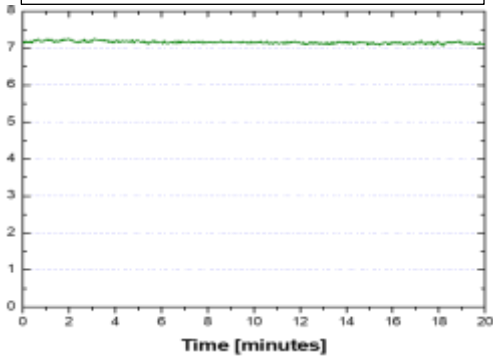

TEC and water chilled models available

Custom tuned to desired wavelength

Sample Spectra

Typical Power Stability

Information

Simple operation needs only laser driver capable of 11 Volts and 9Amps

Custom designs possible

4" x 6" x 1.8" (L x W x H)
